DETAILED ACTION

Election/Restrictions

1. Claims 1-38, 43, 44, and 50-75 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention/species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10 May 2005. Applicant elected group II (apparatus) along with the species pertaining to Figures 1 and 55-62b. Upon further review, the elected species contains many additional species. Please see further restriction below.
2. This application contains claims (elected claims 39-42 and 45-49) directed to the following patentably distinct species of the claimed invention:
 - Species A: Figure 55
 - Species B: Figure 56
 - Species C: Figures 57 and 58
 - Species D: Figures 59a and 59b
 - Species E: Figures 60a and 60b
 - Species F: Figures 61a and 61b
 - Species G: Figures 62a and 62b

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
